Phoenix SS1190K/SS1190E Series

Citadel

Standards

The Phoenix Citadel SS1190 series safe is designed and tested to the latest and prestigious European S2 Standard and protects the contents against burglary and fire attack.

Construction

The body is constructed of double wall galvanised steel plate 3mm thick outer and 2mm inner walls. The locking mechanism engages two solid steel bolts (25mm in diameter) into the body of the safe. This construction method produces a safe of massive strength to prevent even the most determined of thieves gaining access. To add further security, the safe is ready prepared for base fixing to any type of wood, concrete or asphalt floor.

The modern, compact and high quality design provides a safe ideal for business or domestic use to store valuables, cash or documents.

Guarantee

Every Phoenix Citadel safe has a 2 years on site guarantee against manufacturing defect.
