

Global Security SmartTouch Fingerprint Readers

GS30 Fingerprint Access Control

GS30 fingerprint access control and time attendance is a professional access control system developed for small to medium size businesses.

- Multifunction Identification method: Fingerprint, Proximity Card or PIN
- Easy setup and enrolment of new users through the keypad or via management software
- Wiegand output allows connection to existing access control systems for higher security
- Backlit Keypad for ease of use in the dark
- Time Zone and group access control, through Windows based system software
- Direct lock control programmable lock timer for access control
- Includes simple access control software
- BioNano core algorithm platform of high performance and reliability for improved performance on wet and dry fingers
- Mini USB, RS485 and TCP/IP for network connection
- Can be used stand-alone without being connected to a computer using the on-board keypad to add & delete users

GS50M Fingerprint Access Control

GS50M is a new generation of simple standalone access control. With metal case and water resistant cover it provides a high level of protection suitable for outdoor installation.

- Multifunction Identification method: Fingerprint only or PIN
- Easy setup and enrol of new users through the keypad or via management software
- Metal case and water resistant cover suitable for internal and external applications
- Standard RS485, Wiegand 26 bit output, dry contact output, optional TCP/IP network interface
- Wall mounted. Combined 2-in-1 function for both time attendance and access control
- BioNano core fingerprint algorithm
- Can be used stand-alone without being connected to a computer using the on-board keypad to add & delete users

GS5/RFID Fingerprint Access Control

GS5/RFID is an innovative fingerprint card access reader with an integrated Proximity RFID card reader. The compact design of this reader makes it suitable for installation on door frames or in small spaces. GS5/RFID has standard Wiegand output to connect seamlessly with access controllers. GS5/RFID can easily update the existing card readers for higher security level of fingerprint and card.

- Small and compact design – 55mm(w) x 145(h) x 37mm(d)
- Fully sealed, water resistant and dustproof fingerprint sensor
- RFID proximity card reader. Compatible with most standard proximity card types
- RS485 connection to management software or use stand-alone

GS99 USB Fingerprint Reader

GS99 is a USB desktop enrolment reader designed for use with the smart touch fingerprint readers and management software for enrolling new users.
